How to get a clean handprint

1. **Brush, don't dip.** Brush a thin, even layer of paint over the palm and fingers.
2. **Spread the fingers first.** Ask for a "starfish hand" before you start painting.
3. **Press, then press again.** Hand down flat, then press gently on each finger.
4. **Lift straight up.** Hold the paper with your other hand and lift in one go.

Make it last

- Use acrylic or tempera paint on card, not finger paint on printer paper.
- Let it dry for a full day before you stack, fold or frame it.
- Seal salt dough with clear varnish on both sides.
- Keep it out of direct sunlight, and store it flat between sheets of paper.
